

ZENEX TECHNOLOGIES PTE LTD

OUR HISTORY

Our journey began in 2017 as an e-Commerce solutions company which gradually evolved into a 4-party logistics (4PL) specialist, connecting our clients to over 30 countries. We now serve more than 50 customers with their full Supply-Chain and Logistical requirements.

OUR LOCATION

With our warehouse strategically located within the Free Trade Zone and also near to the seaports, we are able to help our clients reach their global customers with our local expertise. In our current phase of expansion with our local partners, we now offer solutions for chiller and freezer storage as well.

OUR STRENGTH

Our core strength lies in providing our clients solutions to their logistical needs, whether it be import, export, dropship, pick/pack fulfilment or just simple warehousing. We are flexible and nimble in our operations to accommodate your unique requirements.

OUR INNOVATION

We derive our innovation from pains experienced during operations. Our development covers both backend office and front end logistical operation. A well place solution to integrate into your existing ERP or run as a standalone integrated platform.

OUR PROGRESS

In a modest span of 5 years, we are proud to have under our belt, happy clients from a wide spread of industries. These include e-commerce, fashion, retail, household, FMCG and even F&B.

WHY CHOOSE US?

- We **Listen** to your **Needs**

Z-LOGISTICS

INVENTORY MANAGEMENT

Keeps track of inventory levels, locations, and movement. It provides accurate information about the quantity of items available and their exact positions within the warehouse. We can manage the inventory in your consignment locations as well.

SERVICE REQUEST

Facilitates the management of orders from receiving to shipping. It can automate the order fulfilment process, ensuring that the right products are picked, packed, and shipped to customers accurately and on time. Our Technological Planform means that you can work at your desired time and we will take over.

DELIVERY MANAGEMENT

Process the planning, coordinating, and optimising the delivery of goods, services, or projects to our customers or stakeholders, ensuring timely and efficient execution. With our very own ADR (Advance Delivery Response) application, assigned deliveries can be seen and how many deliveries are scheduled within the day.

ASSET REPAIR MANAGEMENT

Ensure that our assets remain in optimal working condition, minimising downtime, reducing costs, and extending the lifespan of assets. We maintain a detailed inventory of all assets that require repair and maintenance.

ONBOARDING REGISTRATION

Register your company and make a service request!

Warehouse Management System

Z-LOGISTICS

WE GOT YOU COVERED EVERY STEP OF THE WAY

INBOUND

Simplify the way you work with your suppliers. Making a once paper bound, labour intensive job easy through digitization.

OUTBOUND

Getting your products to your customer is key to customer satisfaction and revenue growth.

INVENTORY MANAGEMENT

Keeps track of inventory levels, locations, and movement. It provides accurate information about the quantity of items available and their exact positions within warehouses.

Synchronise data between multiple locations without the needs to have heaps of paper moving around.
